

AMGEN[®] Biotech Experience

Dear friends,

In 1990, the Amgen Biotech Experience began with the mission of helping more students — regardless of income, race, gender or geography — engage in science in an authentic manner. Much has changed in 30 years, but through the support of partners like you, the program has grown stronger in pursuit of that goal.

Since its founding, you've helped the ABE community reimagine the way science is introduced, experienced and accessed for nearly 850,000 students across Amgen communities. And this year, as COVID-19 threatened the education system as we know it, we adapted to provide free remote tools and resources that are allowing educators and students worldwide to continue science learning.

While there is still more work to be done, we're enormously proud of what we've achieved together. Here's to the next 30 — to the next generation of scientists and scientifically-literate citizens — who will change the world for the better.

Onward,

Scott Heimlich, Ed.D.

Vice President, Amgen Foundation
